Index

Volume 5 Subject Index 1996

2.25Cr-1Mo
Numerical Prediction of Microstructure and Hardness in Multicycle Simulations 5,3; 365-372

302 stainless steel
Wear Behavior of Al2O3-TiCN Composite Ceramic Sliding on Stainless Steel 5,4; 441-445

accelerated leaching
Evaluation of High Ni-Cr-Mo Alloys for the Construction of Sulfur Dioxide Scrubber Plants 5,1; 46-50

active metal
Brazing Diamond Grits onto a Steel Substrate Using Copper Alloys as the Filler Metals 5,6; 761-766

adhesive wear
Wear Behavior of Al_2O_3-TiCN Composite Ceramic Sliding on Stainless Steel 5,4; 441-445

aging
Study of Aging and Embrittlement of Microalloyed Steel Bars 5,5; 615-620

air exposure
Release of Water and Hydrogen during Outgassing of Some Materials 5,4; 516-520

Al 5454-H32
Effect of Corrosive Environment on the Fatigue Crack Initiation and Propagation Behavior of Al 5454-H32 5,1; 78-83

Alloy 59
Evaluation of High Ni-Cr-Mo Alloys for the Construction of Sulfur Dioxide Scrubber Plants 5,1; 46-50

Alloy 600
Effect of Prior Machining Deformation on the Development of Tensile Residual Stresses in Weld-Fabricated Nuclear Components 5,1; 51-56

Alloy C-276
Evaluation of High Ni-Cr-Mo Alloys for the Construction of Sulfur Dioxide Scrubber Plants 5,1; 46-50

aluminum
Analysis of Refining of Aluminum Using Fractional Solidification with Forced Convection 5,5; 651-656

aluminum alloy
Degradation of RSP/PM Al-8Fe-4Ce during Creep 5,2; 256-259
Effect of Corrosive Environment on the Fatigue Crack Initiation and Propagation Behavior of Al 5454-H32 5,1; 78-83
Effect of Iron and Combined Iron and Beryllium Additions on the Fracture Toughness and Microstructures of Squeeze-Cast Al-7Si-0.3Mg Alloy 5,4; 462-468
Effects of Thermal Processing and Copper Additions on the Mechanical Properties of Aluminum Alloy Ingot AA 2618 5,1; 100-102
The Optimized Mechanical Properties of the New Aluminum Alloy AA 6069 5,1; 111-116

aluminum silicon
The Optimized Mechanical Properties of the New Aluminum Alloy AA 6069 5,1; 111-116

aluminum-silicon alloys
Laser Cladding of Iron-Base Alloy on Al-Si Alloy and Its Relation to Cracking at the Interface 5,6; 775-783

ammonia cylinder
Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38

amorphous
Amorphous Superconducting Transformation in Bismuth-Base High-T_c Superconducting Rods 5,4; 446-451

analysis
Analysis of Surface Heating by Induction 5,5; 657-662

annealing
A New Process to Develop (100) Texture in Silicon Steel Sheets 5,3; 316-322

annealing index
Kinetics of Nonisothermal Recrystallization 5,2; 213-219

anodic polarization
Influence of Sigma-Phase Formation on the Localized Corrosion Behavior of a Duplex Stainless Steel 5,4; 500-506

APM
Solid-State Hot Pressing of Elemental Aluminum and Titanium Powders to Form TiAl ($\gamma + \alpha_2$) Intermetallic Microstructure 5,5; 583-588

argon blowing
Evaluation of the Superplastic Formability of SP-Inconel 718 Superalloy 5,1; 71-77

Arrhenius equation
Kinetics of Nonisothermal Recrystallization 5,2; 213-219

asymmetrical cold rolling
Stress Analysis of Asymmetrical Cold Rolling of Clad Sheet Using the Slab Method 5,5; 621-631

austenite
Modeling of Phase Transformation Behavior in Hot-Deformed and Continuously Cooled C-Mn Steels 5,4; 521-525

austenite grain size
Effects of Niobium Additions on the Structure, Depth, and Austenite Grain Size of the Case of Carburized 0.07% C Steels 5,5; 593-597

austenitic stainless steel
Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537
Micromagnetic and Mössbauer Spectroscopic Investigation of Strain-Induced Martensite in Austenitic Stainless Steel 5,4; 538-542
Stress-Induced Martensitic Transformation in Metastable Austenitic Stainless Steels: Effect on Fatigue Crack Growth Rate 5,2; 201-208

axial field motor
Application of a High-Energy-Density Permanent Magnet Material in Underwater Systems 5,3; 299-309

bainite
Modeling of Phase Transformation Behavior in Hot-Deformed and Continuously Cooled C-Mn Steels 5,4; 521-525

bainite microstructure
Instrumented Impact Properties of Some Advanced Nuclear Reactor Pressure Vessel Steels 5,3; 328-334

bearing steel
The Modeling of Structure and Properties of Carburized Low-Chromium Hypereutectoid Steels 5,2; 165-191

beryllium
Effect of Iron and Combined Iron and Beryllium Additions on the Fracture Toughness and Microstructures of Squeeze-Cast Al-7Si-0.3Mg Alloy 5,4; 462-468

beta titanium alloys
Bulk Deformation of Ti-6.8Mo-4.5Fe-1.5Al (Timetal LCB) Alloy 5,3; 335-352

bicarbonate cracking
Evaluation of the Propensity of Replacements for Halon 1301 to Induce Stress-Corrosion Cracking in Alloys Used in Aircraft Fire-Suppressant Storage and Distribution Systems 5,4; 507-515

bonding
Platinum Solder Core Wire: Development and Industrial Implications 5,3; 381-386

bonding wires
Transistor Bonding Wire Corrosion in Type TO Cans 5,1; 39-45

boundary lubrication
Wear Behavior of Al_2O_3-TiCN Composite Ceramic Sliding on Stainless Steel 5,4; 441-445

brazing
Brazing Diamond Grits onto a Steel Substrate Using Copper Alloys as the Filler Metals 5,6; 761-766
Brazing Si_3N_4 Ceramic to AISI 5140 Steel under Pressure 5,2; 209-212

bulk behavior determination
Identification of the Bulk Behavior in the Near-Contact-Surface of Steel Workpieces 5,6; 734-742

carbide precipitation
Reheat Cracking Studies on Simulated Heat-Affected Zones of CrMoV Turbine Rotor Steels 5,3; 353-364

carbon steel
Effects of Niobium Additions on the Structure, Depth, and Austenite Grain Size of the Case of Carburized 0.07% C Steels 5,5; 593-597

carbon-manganese steels
Modeling of Phase Transformation Behavior in Hot-Deformed and Continuously Cooled C-Mn Steels 5,4; 521-525

carburized modeling
The Modeling of Structure and Properties of Carburized Low-Chromium Hypereutectoid Steels 5,2; 165-191

carburizing
Effects of Niobium Additions on the Structure, Depth, and Austenite Grain Size of the Case of Carburized 0.07% C Steels 5,5; 593-597
The Modeling of Structure and Properties of Carburized Low-Chromium Hypereutectoid Steels 5,2; 165-191

case hardening
Effects of Niobium Additions on the Structure, Depth, and Austenite Grain Size of the Case of Carburized 0.07% C Steels 5,5; 593-597

ceramics
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234
Wear Behavior of Al_2O_3-TiCN Composite Ceramic Sliding on Stainless Steel 5,4; 441-445

ceramic-metal
Brazing Si_3N_4 Ceramic to AISI 5140 steel under Pressure 5,2; 209-212

chemical composition
Prediction of Jominy Hardness Profiles of Steels Using Artificial Neural Networks 5,1; 57-63

chromium
Critical Issues Concerning the Mechanisms of Duplex Grain Structure Formation and Interpretation of Duplex NiO Grown on Pure Ni and Cr Doped Substrates during High-Temperature Oxidation 5,6; 699-709

clad sheet
Stress Analysis of Asymmetrical Cold Rolling of Clad Sheet Using the Slab Method 5,5; 621-631

cladding
Laser Cladding of Iron-Base Alloy on Al-Si Alloy and Its Relation to Cracking at the Interface 5,6; 775-783

coal gasification
Properties of Sulfur Sorbents Containing Dispersed Nickel in an Al_2O_3 Matrix 5,2; 247-255

coating
Effect of Coating Characteristics on Friction and Formability of Zn-Fe Alloy Electroplated Sheet Steel 5,4; 469-477

composites
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

compression testing
Bulk Deformation of Ti-6.8Mo-4.5Fe-1.5Al (Timetal LCB) Alloy 5,3; 335-352

computer analyses
Effects of Turbulence and Lubricant Inertia on Dynamics of Journal Bearings Lubricated with Molten Zinc in a Galvanizing Process 5,6; 710-727

computer model
Modeling of Phase Transformation Behavior in Hot-Deformed and Continuously Cooled C-Mn Steels 5,4; 521-525

continuous casting
A New Tensile Testing Procedure for Predicting Transverse Cracking Susceptibility of Continuous Casting Slabs 5,2; 260-268

copper
Effects of Thermal Processing and Copper Additions on the Mechanical Properties of Aluminum Alloy Ingot AA 2618 5,1; 100-102

copper alloys
Brazing Diamond Grits onto a Steel Substrate Using Copper Alloys as the Filler Metals 5,6; 761-766
New High-Temperature Copper Alloys 5,6; 695-698

core loss
Development of Low-Loss Grain-Oriented Silicon Steel 5,3; 310-315

corrosion
Effect of Corrosive Environment on the Fatigue Crack Initiation and Propagation Behavior of Al 5454-H32 5,1; 78-83
Transistor Bonding Wire Corrosion in Type TO Cans 5,1; 39-45

corrosion rate
Evaluation of Corrosion Behavior of Al-Mg-Li Alloys in Seawater 5,2; 235-240

coupled thermo-elastic-plastic
A Three-Dimensional Finite Element Method for a Nonisothermal Aluminum Flat Strip Rolling Process 5,4; 452-461

crack growth rate
Stress-Induced Martensitic Transformation in Metastable Austenitic Stainless Steels: Effect on Fatigue Crack Growth Rate 5,2; 201-208

crack-temperature path
A New Tensile Testing Procedure for Predicting Transverse Cracking Susceptibility of Continuous Casting Slabs 5,2; 260-268

creep testing
Degradation of RSP/PM Al-8Fe-4Ce during Creep 5,2; 256-259

CrMoV steels
Reheat Cracking Studies on Simulated Heat-Affected Zones of CrMoV Turbine Rotor Steels 5,3; 353-364

Cu-Ni-Si-Cr-Zr-Ti alloys
New High-Temperature Copper Alloys 5,6; 695-698

decarburization
A New Process to Develop (100) Texture in Silicon Steel Sheets 5,3; 316-322

decomposition
Superplastic Forming by Decomposition of ($CaCO_3$ + C) and $MgCO_3$ 5,3; 387-395

deformation
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26
The Structure and Deformation Behavior of Zinc-Rich Coatings on Steel Sheet 5,5; 601-608

desulfurization
Properties of Sulfur Sorbents Containing Dispersed Nickel in an Al_2O_3 Matrix 5,2; 247-255

diamond tool
Brazing Diamond Grits onto a Steel Substrate Using Copper Alloys as the Filler Metals 5,6; 761-766

die design
Optimization of Microstructure Development: Application to Hot Metal Extrusion 5,6; 743-752

die heating
Effects of Pressure, Die, and Stress-Relief Temperatures on the Residual Stresses and Mechanical Properties of Squeeze-Cast Aluminum Rods 5,3; 399-404

diffusion bonding
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

directionally solidified superalloys
Processing and Microstructure of Investment Casting Turbine Blade NITAC In-Situ Composites 5,1; 103-110

dislocation
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26

dome height
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

ductile fracture
Validity Assessment of Ductile Fracture Criteria in Cold Forming 5,4; 478-488

duplex stainless steel
Influence of Sigma-Phase Formation on the Localized Corrosion Behavior of a Duplex Stainless Steel 5,4; 500-506
Role of Surface Finishing on Pitting Corrosion of a Duplex Stainless Steel in Seawater 5,2; 225-231

dynamic properties
Effect of Moisture on Hammer-Milled Glass-Fiber-Reinforced Polyurethane 5,5; 598-600

dynamic recrystallization
Optimization of Microstructure Development: Application to Hot Metal Extrusion 5,6; 743-752

effect of moisture
Effect of Moisture on Hammer-Milled Glass-Fiber-Reinforced Polyurethane 5,5; 598-600

effects of porosity
On the Influence of Porosity on the Portevin-Le Chatelier Effect in Sintered Iron 5,5; 646-650

effects of temperature
On the Influence of Porosity on the Portevin-Le Chatelier Effect in Sintered Iron 5,5; 646-650

elastic
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

elastoplastic finite element analysis
Identification of the Bulk Behavior in the Near-Contact-Surface of Steel Workpieces 5,6; 734-742

electric motor
Application of a High-Energy-Density Permanent Magnet Material in Underwater Systems 5,3; 299-309

electrochemical testing
Role of Surface Finishing on Pitting Corrosion of a Duplex Stainless Steel in Seawater 5,2; 225-231

enthalpy
Amorphous Superconducting Transformation in Bismuth-Base High-T_c Superconducting Rods 5,4; 446-451

environmentally assisted fracture
Evaluation of the Propensity of Replacements for Halon 1301 to Induce Stress-Corrosion Cracking in Alloys Used in Aircraft Fire-Suppressant Storage and Distribution Systems 5,4; 507-515

EPM
Solid-State Hot Pressing of Elemental Aluminum and Titanium Powders to Form TiAl ($\gamma + \alpha_2$) Intermetallic Microstructure 5,5; 583-588

exposure
Transmission Electron Microscopy Study of Stress-Ruptured Aged 304H Stainless Steel after Prolonged Exposure in Service 5,6; 691-694

extrusion
Optimization of Microstructure Development: Application to Hot Metal Extrusion 5,6; 743-752
The Optimized Mechanical Properties of the New Aluminum Alloy AA 6069 5,1; 111-116

factor analysis
Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537

failure analysis
Failure Analysis of an Ammonia Refrigerant Condenser Tube 5,2; 241-246

fatigue
Effect of Corrosive Environment on the Fatigue Crack Initiation and Propagation Behavior of Al 5454-H32 5,1; 78-83
Stress-Induced Martensitic Transformation in Metastable Austenitic Stainless Steels: Effect on Fatigue Crack Growth Rate 5,2; 201-208

FEA modeling
Application of a High-Energy-Density Permanent Magnet Material in Underwater Systems 5,3; 299-309

ferrite
Modeling of Phase Transformation Behavior in Hot-Deformed and Continuously Cooled C-Mn Steels 5,4; 521-525

fiber-reinforced polyurethane
Effect of Moisture on Hammer-Milled Glass-Fiber-Reinforced Polyurethane 5,5; 598-600

field testing
Role of Surface Finishing on Pitting Corrosion of a Duplex Stainless Steel in Seawater 5,2; 225-231

finite-element method
Application of the Finite-Element Method to a Design of Optimized Tool Geometry for the O.S.U. Formability Test 5,4; 489-499
A Three-Dimensional Finite Element Method for a Nonisothermal Aluminum Flat Strip Rolling Process 5,4; 452-461

flow velocity
Evaluation of Corrosion Behavior of Al-Mg-Li Alloys in Seawater 5,2; 235-240

flue gas desulfurization
Evaluation of High Ni-Cr-Mo Alloys for the Construction of Sulfur Dioxide Scrubber Plants 5,1; 46-50

formability
Effect of Coating Characteristics on Friction and Formability of Zn-Fe Alloy Electroplated Sheet Steel 5,4; 469-477

forming
Validity Assessment of Ductile Fracture Criteria in Cold Forming 5,4; 478-488

forming parameters
Evaluation of the Superplastic Formability of SP-Inconel 718 Superalloy 5,1; 71-77

forming speed
Superplastic Forming by Decomposition of ($CaCO_3$ + C) and $MgCO_3$ 5,3; 387-395

fractography
Instrumented Impact Properties of Some Advanced Nuclear Reactor Pressure Vessel Steels 5,3; 328-334
New High-Temperature Copper Alloys 5,6; 695-698

fracture criteria
Validity Assessment of Ductile Fracture Criteria in Cold Forming 5,4; 478-488

fracture toughness
Hydrogen Embrittlement and Fracture Toughness of a Titanium Alloy with Surface Modification by Hard Coatings 5,1; 64-70
New High-Temperature Copper Alloys 5,6; 695-698
The Prediction of Fracture Toughness from Specific Microstructural Measurements in Engineering Alloys 5,5; 632-636

free blowing
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

frequency
Analysis of Surface Heating by Induction 5,5; 657-662

friction
Effect of Coating Characteristics on Friction and Formability of Zn-Fe Alloy Electroplated Sheet Steel 5,4; 469-477

friction welding
Friction Welding of Al-Al, Al-Steel, and Steel-Steel Samples 5,1; 89-99

Galfan
The Structure and Deformation Behavior of Zinc-Rich Coatings on Steel Sheet 5,5; 601-608

Galvalume
The Structure and Deformation Behavior of Zinc-Rich Coatings on Steel Sheet 5,5; 601-608

galvanized coatings
The Structure and Deformation Behavior of Zinc-Rich Coatings on Steel Sheet 5,5; 601-608

galvanizing
Effects of Turbulence and Lubricant Inertia on Dynamics of Journal Bearings Lubricated with Molten Zinc in a Galvanizing Process 5,6; 710-727

gas tunnel type plasma jet
Surface Nitridation of Titanium Metal by Means of a Gas Tunnel Type Plasma Jet 5,3; 373-380

geometrical characteristic of cut
Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537

Gleeble
Reheat Cracking Studies on Simulated Heat-Affected Zones of CrMoV Turbine Rotor Steels 5,3; 353-364

grain-oriented silicon steel
Development of Low-Loss Grain-Oriented Silicon Steel 5,3; 310-315

grinding
Release of Water and Hydrogen during Outgassing of Some Materials 5,4; 516-520
Role of Surface Finishing on Pitting Corrosion of a Duplex Stainless Steel in Seawater 5,2; 225-231

halon alternatives
Evaluation of the Propensity of Replacements for Halon 1301 to Induce Stress-Corrosion Cracking in Alloys Used in Aircraft Fire-Suppressant Storage and Distribution Systems 5,4; 507-515

hardenability
Prediction of Jominy Hardness Profiles of Steels Using Artificial Neural Networks 5,1; 57-63

heat transfer
Friction Welding of Al-Al, Al-Steel, and Steel-Steel Samples 5,1; 89-99

high strain rate
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26

high strength
The Optimized Mechanical Properties of the New Aluminum Alloy AA 6069 5,1; 111-116

high-carbon steels
Development of Microalloyed High-Carbon Steels for Plough Disks 5,6; 767-774

high-temperature
Effects of Thermal Processing and Copper Additions on the Mechanical Properties of Aluminum Alloy Ingot AA 2618 5,1; 100-102

hot ductility
A New Tensile Testing Procedure for Predicting Transverse Cracking Susceptibility of Continuous Casting Slabs 5,2; 260-268

HP/IP turbine rotor
Reheat Cracking Studies on Simulated Heat-Affected Zones of CrMoV Turbine Rotor Steels 5,3; 353-364

humidity
Transistor Bonding Wire Corrosion in Type TO Cans 5,1; 39-45

hydrogen
Release of Water and Hydrogen during Outgassing of Some Materials 5,4; 516-520

hydrogen embrittlement
Hydrogen Embrittlement and Fracture Toughness of a Titanium Alloy with Surface Modification by Hard Coatings 5,1; 64-70

impact toughness
Instrumented Impact Properties of Some Advanced Nuclear Reactor Pressure Vessel Steels 5,3; 328-334

in situ melting
A New Tensile Testing Procedure for Predicting Transverse Cracking Susceptibility of Continuous Casting Slabs 5,2; 260-268

induction hardening
Management of Materials Properties in an Electro-Thermo-Metallurgical Simulation of Quenching Following Inductive Surface Heating 5,2; 192-200

induction heating
Analysis of Surface Heating by Induction 5,5; 657-662
Management of Materials Properties in an Electro-Thermo-Metallurgical Simulation of Quenching Following Inductive Surface Heating 5,2; 192-200

inductive heat modeling
Management of Materials Properties in an Electro-Thermo-Metallurgical Simulation of Quenching Following Inductive Surface Heating 5,2; 192-200

inductively coupled plasma spectrometry
Versatility of Superaustenitic Stainless Steels in Marine Applications 5,5; 577-582

inhibitor
Development of High-Temperature Hot-Rolling Process for Grain-Oriented Silicon Steel 5,3; 323-327

in-situ eutectics
Processing and Microstructure of Investment Casting Turbine Blade NITAC In-Situ Composites 5,1; 103-110

integrated motor/pump
Application of a High-Energy-Density Permanent Magnet Material in Underwater Systems 5,3; 299-309

interface
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

interface cracking
Laser Cladding of Iron-Base Alloy on Al-Si Alloy and Its Relation to Cracking at the Interface 5,6; 775-783

intergranular corrosion
Influence of Sigma-Phase Formation on the Localized Corrosion Behavior of a Duplex Stainless Steel 5,4; 500-506

intermetallics
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

internal pressure
Superplastic Forming by Decomposition of ($CaCO_3$ + C) and $MgCO_3$ 5,3; 387-395

ion implantation
Hydrogen Embrittlement and Fracture Toughness of a Titanium Alloy with Surface Modification by Hard Coatings 5,1; 64-70

iron
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26
Effect of Iron and Combined Iron and Beryllium Additions on the Fracture Toughness and Microstructures of Squeeze-Cast Al-7Si-0.3Mg Alloy 5,4; 462-468

iron powders
Microstructure and Mechanical Reliability of Powder Metallurgy (P/M) Ferrous Alloys 5,1; 27-33

jewelry chain
Platinum Solder Core Wire: Development and Industrial Implications 5,3; 381-386

jominy end-quench test
Prediction of Jominy Hardness Profiles of Steels Using Artificial Neural Networks 5,1; 57-63

kinetic energy penetrator
Performance of Powder-Injection-Molded W-4.9Ni-2.1Fe Components 5,5; 609-614

kinetics
Amorphous Superconducting Transformation in Bismuth-Base High-T_c Superconducting Rods 5,4; 446-451
Kinetics of Nonisothermal Recrystallization 5,2; 213-219

Kirkendall effect
Solid-State Hot Pressing of Elemental Aluminum and Titanium Powders to Form TiAl ($\gamma + \alpha_2$) Intermetallic Microstructure 5,5; 583-588

laser
Laser Cladding of Iron-Base Alloy on Al-Si Alloy and Its Relation to Cracking at the Interface 5,6; 775-783

laser cutting
Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537

laser cutting parameters
Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537

laser melting
Laser Melting of Ti-15Al-20Nb Alloy 5,1; 124-128

LCB titanium
Bulk Deformation of Ti-6.8Mo-4.5Fe-1.5Al (Timetal LCB) Alloy 5,3; 335-352

limit diagrams
Validity Assessment of Ductile Fracture Criteria in Cold Forming 5,4; 478-488

line scan
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

liquid
Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38

longitudinal slitting method
Effects of Pressure, Die, and Stress-Relief Temperatures on the Residual Stresses and Mechanical Properties of Squeeze-Cast Aluminum Rods 5,3; 399-404

lubricants
Effects of Turbulence and Lubricant Inertia on Dynamics of Journal Bearings Lubricated with Molten Zinc in a Galvanizing Process 5,6; 710-727

Ludwik's model
Identification of the Bulk Behavior in the Near-Contact-Surface of Steel Workpieces 5,6; 734-742

machining
Effect of Prior Machining Deformation on the Development of Tensile Residual Stresses in Weld-Fabricated Nuclear Components 5,1; 51-56

magnetic domain
Development of Low-Loss Grain-Oriented Silicon Steel 5,3; 310-315

martensite formation
Micromagnetic and Mössbauer Spectroscopic Investigation of Strain-Induced Martensite in Austenitic Stainless Steel 5,4; 538-542

mass spectrometry
Release of Water and Hydrogen during Outgassing of Some Materials 5,4; 516-520

mathematical model
Application of a Time-Dependent Constitutive Model to Rheocast Systems 5,1; 117-123

mechanical properties
Comparison of Vacuum and Pressure-Assisted Sintering of TiB_2-Ni 5,3; 396-398
High-Temperature Precision Forming of Titanium Blades 5,5; 589-592
On the Influence of Porosity on the Portevin-Le Chatelier Effect in Sintered Iron 5,5; 646-650
Performance of Powder-Injection-Molded W-4.9Ni-2.1Fe Components 5,5; 609-614

mechanical working
Micromagnetic and Mössbauer Spectroscopic Investigation of Strain-Induced Martensite in Austenitic Stainless Steel 5,4; 538-542

metalforming
Validity Assessment of Ductile Fracture Criteria in Cold Forming 5,4; 478-488

microalloyed
Study of Aging and Embrittlement of Microalloyed Steel Bars 5,5; 615-620

microalloyed steels
Development of Microalloyed High-Carbon Steels for Plough Disks 5,6; 767-774

microbiologically influenced corrosion (MIC)
Role of Surface Finishing on Pitting Corrosion of a Duplex Stainless Steel in Seawater 5,2; 225-231

microelectronics
Transistor Bonding Wire Corrosion in Type TO Cans 5,1; 39-45

microfracture
Amorphous Superconducting Transformation in Bismuth-Base High-T_c Superconducting Rods 5,4; 446-451
Wear Behavior of Al_2O_3-TiCN Composite Ceramic Sliding on Stainless Steel 5,4; 441-445

microstructure
Numerical Prediction of Microstructure and Hardness in Multicycle Simulations 5,3; 365-372
The Prediction of Fracture Toughness from Specific Microstructural Measurements in Engineering Alloys 5,5; 632-636

microstructure modeling
Optimization of Microstructure Development: Application to Hot Metal Extrusion 5,6; 743-752

molybdenum disilicide
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

neural networks
Prediction of Jominy Hardness Profiles of Steels Using Artificial Neural Networks 5,1; 57-63

nickel
Critical Issues Concerning the Mechanisms of Duplex Grain Structure Formation and Interpretation of Duplex NiO Grown on Pure Ni and Cr Doped Substrates during High-Temperature Oxidation 5,6; 699-709
Properties of Sulfur Sorbents Containing Dispersed Nickel in an Al_2O_3 Matrix 5,2; 247-255

Ni-Co-Cr alloys
Postweld Solution Annealing Effects on the Ductility of Ni-Co-Cr-Base Alloy Gas Tungsten Arc Welds 5,6; 784-790

Ni-Cr-Mo alloys
Evaluation of High Ni-Cr-Mo Alloys for the Construction of Sulfur Dioxide Scrubber Plants 5,1; 46-50

NITAC alloys
Processing and Microstructure of Investment Casting Turbine Blade NITAC In-Situ Composites 5,1; 103-110

nonisothermal
Kinetics of Nonisothermal Recrystallization 5,2; 213-219

nonisothermal rolling
A Three-Dimensional Finite Element Method for a Nonisothermal Aluminum Flat Strip Rolling Process 5,4; 452-461

non-Newtonian flow
Application of a Time-Dependent Constitutive Model to Rheocast Systems 5,1; 117-123

optimal control theory
Optimization of Microstructure Development: Application to Hot Metal Extrusion 5,6; 743-752

optimization
Numerical Modeling of a Wing Skin Peen Forming Process 5,6; 753-760

optimized tool geometry
Application of the Finite-Element Method to a Design of Optimized Tool Geometry for the O.S.U. Formability Test 5,4; 489-499

orientation distribution
Characterization of the Orientation Structure and Distribution in Rolled Polypropylene 5,5; 637-645

orientation structure
Characterization of the Orientation Structure and Distribution in Rolled Polypropylene 5,5; 637-645

O.S.U. formability test
Application of the Finite-Element Method to a Design of Optimized Tool Geometry for the O.S.U. Formability Test 5,4; 489-499

outgassing
Release of Water and Hydrogen during Outgassing of Some Materials 5,4; 516-520

oxidation
Critical Issues Concerning the Mechanisms of Duplex Grain Structure Formation and Interpretation of Duplex NiO Grown on Pure Ni and Cr Doped Substrates during High-Temperature Oxidation 5,6; 699-709

pearlite
Modeling of Phase Transformation Behavior in Hot-Deformed and Continuously Cooled C-Mn Steels 5,4; 521-525

penetration depth
Analysis of Surface Heating by Induction 5,5; 657-662

pentatitanium trisilicide
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

permanent magnet motor
Application of a High-Energy-Density Permanent Magnet Material in Underwater Systems 5,3; 299-309

phase transformation
A New Process to Develop (100) Texture in Silicon Steel Sheets 5,3; 316-322
Modeling of Phase Transformation Behavior in Hot-Deformed and Continuously Cooled C-Mn Steels 5,4; 521-525

piston
Effects of Thermal Processing and Copper Additions on the Mechanical Properties of Aluminum Alloy Ingot AA 2618 5,1; 100-102

pitting corrosion
Evaluation of High Ni-Cr-Mo Alloys for the Construction of Sulfur Dioxide Scrubber Plants 5,1; 46-50
Influence of Sigma-Phase Formation on the Localized Corrosion Behavior of a Duplex Stainless Steel 5,4; 500-506

pitting susceptibility
Evaluation of Corrosion Behavior of Al-Mg-Li Alloys in Seawater 5,2; 235-240

plasma coatings
Surface Nitridation of Titanium Metal by Means of a Gas Tunnel Type Plasma Jet 5,3; 373-380

plasma nitriding
Hydrogen Embrittlement and Fracture Toughness of a Titanium Alloy with Surface Modification by Hard Coatings 5,1; 64-70
Investigation into Nitrided Spur Gears 5,6; 728-733
Investigation into Some Tribological Properties of Plasma Nitrided Hot-Worked Tool Steel AISI H11 5,2; 220-224

platinum
Platinum Solder Core Wire: Development and Industrial Implications 5,3; 381-386

plough disks
Development of Microalloyed High-Carbon Steels for Plough Disks 5,6; 767-774

plough steels
Development of Microalloyed High-Carbon Steels for Plough Disks 5,6; 767-774

polycrystalline
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26

polypropylene
Characterization of the Orientation Structure and Distribution in Rolled Polypropylene 5,5; 637-645

post-forming speed
Superplastic Forming by Decomposition of ($CaCO_3$ + C) and $MgCO_3$ 5,3; 387-395

postweld heat treatment
Postweld Solution Annealing Effects on the Ductility of Ni-Co-Cr-Base Alloy Gas Tungsten Arc Welds 5,6; 784-790

potentiodynamic polarization
Evaluation of Corrosion Behavior of Al-Mg-Li Alloys in Seawater 5,2; 235-240

powder injection molding
Performance of Powder-Injection-Molded W-4.9Ni-2.1Fe Components 5,5; 609-614

powder metallurgy
Degradation of RSP/PM Al-8Fe-4Ce during Creep 5,2; 256-259
Microstructure and Mechanical Reliability of Powder Metallurgy (P/M) Ferrous Alloys 5,1; 27-33

precipitates
Evaluation of Corrosion Behavior of Al-Mg-Li Alloys in Seawater 5,2; 235-240

prediction
Numerical Prediction of Microstructure and Hardness in Multicycle Simulations 5,3; 365-372

pressure
Brazing Si_3N_4 Ceramic to AISI 5140 Steel under Pressure 5,2; 209-212
Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38

pressure vessel steels
Instrumented Impact Properties of Some Advanced Nuclear Reactor Pressure Vessel Steels 5,3; 328-334

pressure-assisted sintering
Comparison of Vacuum and Pressure-Assisted Sintering of TiB_2-Ni 5,3; 396-398

process design
Optimization of Microstructure Development: Application to Hot Metal Extrusion 5,6; 743-752

quench modeling
Management of Materials Properties in an Electro-Thermo-Metallurgical Simulation of Quenching Following Inductive Surface Heating 5,2; 192-200

rapid solidification processing
Degradation of RSP/PM Al-8Fe-4Ce during Creep 5,2; 256-259

rebend
Study of Aging and Embrittlement of Microalloyed Steel Bars 5,5; 615-620

recrystallization
Kinetics of Nonisothermal Recrystallization 5,2; 213-219

refining
Analysis of Refining of Aluminum Using Fractional Solidification with Forced Convection 5,5; 651-656

reheat cracking
Reheat Cracking Studies on Simulated Heat-Affected Zones of CrMoV Turbine Rotor Steels 5,3; 353-364

reinforced steel
Study of Aging and Embrittlement of Microalloyed Steel Bars 5,5; 615-620

reliability
Microstructure and Mechanical Reliability of Powder Metallurgy (P/M) Ferrous Alloys 5,1; 27-33
Transistor Bonding Wire Corrosion in Type TO Cans 5,1; 39-45

removal of manganese
A New Process to Develop (100) Texture in Silicon Steel Sheets 5,3; 316-322

residual stress
Effect of Prior Machining Deformation on the Development of Tensile Residual Stresses in Weld-Fabricated Nuclear Components 5,1; 51-56
Effects of Pressure, Die, and Stress-Relief Temperatures on the Residual Stresses and Mechanical Properties of Squeeze-Cast Aluminum Rods 5,3; 399-404

rheocasting
Application of a Time-Dependent Constitutive Model to Rheocast Systems 5,1; 117-123

rheological behavior
Performance of Powder-Injection-Molded W-4.9Ni-2.1Fe Components 5,5; 609-614

rupture
Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38

sandblasting
Role of Surface Finishing on Pitting Corrosion of a Duplex Stainless Steel in Seawater 5,2; 225-231

seawater
Role of Surface Finishing on Pitting Corrosion of a Duplex Stainless Steel in Seawater 5,2; 225-231
Versatility of Superaustenitic Stainless Steels in Marine Applications 5,5; 577-582

semisolid slurry
Application of a Time-Dependent Constitutive Model to Rheocast Systems 5,1; 117-123

shear bands
Bulk Deformation of Ti-6.8Mo-4.5Fe-1.5Al (Timetal LCB) Alloy 5,3; 335-352

shear modulus
Effect of Moisture on Hammer-Milled Glass-Fiber-Reinforced Polyurethane 5,5; 598-600

shear strength
Brazing Si_3N_4 Ceramic to AISI 5140 Steel under Pressure 5,2; 209-212

sheet-formability test
Application of the Finite-Element Method to a Design of Optimized Tool Geometry for the O.S.U. Formability Test 5,4; 489-499

shot peening
Numerical Modeling of a Wing Skin Peen Forming Process 5,6; 753-760

sigma phase
Influence of Sigma-Phase Formation on the Localized Corrosion Behavior of a Duplex Stainless Steel 5,4; 500-506

silicon steel
A New Process to Develop (100) Texture in Silicon Steel Sheets 5,3; 316-322
Development of High-Temperature Hot-Rolling Process for Grain-Oriented Silicon Steel 5,3; 323-327

single-crystal turbine blades
Processing and Microstructure of Investment Casting Turbine Blade NITAC In-Situ Composites 5,1; 103-110

sintered iron
On the Influence of Porosity on the Portevin-Le Chatelier Effect in Sintered Iron 5,5; 646-650

slow strain rate (SSR)
Evaluation of the Propensity of Replacements for Halon 1301 to Induce Stress-Corrosion Cracking in Alloys Used in Aircraft Fire-Suppressant Storage and Distribution Systems 5,4; 507-515

solder
Platinum Solder Core Wire: Development and Industrial Implications 5,3; 381-386

solder core
Platinum Solder Core Wire: Development and Industrial Implications 5,3; 381-386

solidification
Analysis of Refining of Aluminum Using Fractional Solidification with Forced Convection 5,5; 651-656

solution treatment
Development of High-Temperature Hot-Rolling Process for Grain-Oriented Silicon Steel 5,3; 323-327

SP-Inconel 718 superalloy
Evaluation of the Superplastic Formability of SP-Inconel 718 Superalloy 5,1; 71-77

spur gear
Investigation into Nitrided Spur Gears 5,6; 728-733

squeeze cast
Effects of Pressure, Die, and Stress-Relief Temperatures on the Residual Stresses and Mechanical Properties of Squeeze-Cast Aluminum Rods 5,3; 399-404

squeeze casting
Effect of Iron and Combined Iron and Beryllium Additions on the Fracture Toughness and Microstructures of Squeeze-Cast Al-7Si-0.3Mg Alloy 5,4; 462-468

stainless steel
Transmission Electron Microscopy Study of Stress-Ruptured Aged 304H Stainless Steel after Prolonged Exposure in Service 5,6; 691-694

static recrystallization
Development of High-Temperature Hot-Rolling Process for Grain-Oriented Silicon Steel 5,3; 323-327

statistical modeling
Prediction of Jominy Hardness Profiles of Steels Using Artificial Neural Networks 5,1; 57-63

steel
Analysis of Surface Heating by Induction 5,5; 657-662
Effect of Coating Characteristics on Friction and Formability of Zn-Fe Alloy Electroplated Sheet Steel 5,4; 469-477

steel forming processes
Identification of the Bulk Behavior in the Near-Contact-Surface of Steel Workpieces 5,6; 734-742

steel type API 5L gr. B
Failure Analysis of an Ammonia Refrigerant Condenser Tube 5,2; 241-246

strain hardening
Micromagnetic and Mössbauer Spectroscopic Investigation of Strain-Induced Martensite in Austenitic Stainless Steel 5,4; 538-542

stress corrosion cracking (SCC)
Evaluation of the Propensity of Replacements for Halon 1301 to Induce Stress-Corrosion Cracking in Alloys Used in Aircraft Fire-Suppressant Storage and Distribution Systems 5,4; 507-515

stress rupture
Transmission Electron Microscopy Study of Stress-Ruptured Aged 304H Stainless Steel after Prolonged Exposure in Service 5,6; 691-694

stress-corrosion cracking
Effect of Prior Machining Deformation on the Development of Tensile Residual Stresses in Weld-Fabricated Nuclear Components 5,1; 51-56

stress-induced transformation
Stress-Induced Martensitic Transformation in Metastable Austenitic Stainless Steels: Effect on Fatigue Crack Growth Rate 5,2; 201-208

stress-relief
Effects of Pressure, Die, and Stress-Relief Temperatures on the Residual Stresses and Mechanical Properties of Squeeze-Cast Aluminum Rods 5,3; 399-404

substructure
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26

superaustenitic stainless steels
Versatility of Superaustenitic Stainless Steels in Marine Applications 5,5; 577-582

superplastic forming
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88
Evaluation of the Superplastic Formability of SP-Inconel 718 Superalloy 5,1; 71-77
Superplastic Forming by Decomposition of ($CaCO_3$ + C) and $MgCO_3$ 5,3; 387-395

superplasticity
High-Temperature Precision Forming of Titanium Blades 5,5; 589-592

surface modification
Surface Nitridation of Titanium Metal by Means of a Gas Tunnel Type Plasma Jet 5,3; 373-380

surface treatment
Laser Melting of Ti-15Al-20Nb Alloy 5,1; 124-128

surface vicinity
Identification of the Bulk Behavior in the Near-Contact-Surface of Steel Workpieces 5,6; 734-742

tangential stress
Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38

TEM
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26
Transmission Electron Microscopy Study of Stress-Ruptured Aged 304H Stainless Steel after Prolonged Exposure in Service 5,6; 691-694

temperature
Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537
Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

temperature signals
Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537

tempering
Numerical Prediction of Microstructure and Hardness in Multicycle Simulations 5,3; 365-372

tensile properties
Postweld Solution Annealing Effects on the Ductility of Ni-Co-Cr-Base Alloy Gas Tungsten Arc Welds 5,6; 784-790

tensile test
A New Tensile Testing Procedure for Predicting Transverse Cracking Susceptibility of Continuous Casting Slabs 5,2; 260-268

tensile testing
New High-Temperature Copper Alloys 5,6; 695-698

ternary phase
Evaluation of Corrosion Behavior of Al-Mg-Li Alloys in Seawater 5,2; 235-240

texture
A New Process to Develop (100) Texture in Silicon Steel Sheets 5,3; 316-322

theory
Critical Issues Concerning the Mechanisms of Duplex Grain Structure Formation and Interpretation of Duplex NiO Grown on Pure Ni and Cr Doped Substrates during High-Temperature Oxidation 5,6; 699-709

thermal transfer
Laser Melting of Ti-15Al-20Nb Alloy 5,1; 124-128

thickness profile
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

Ti-6Al-6V-2Sn
Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

TiB_2
Comparison of Vacuum and Pressure-Assisted Sintering of TiB_2-Ni 5,3; 396-398

TiCN composite
Wear Behavior of Al_2O_3-TiCN Composite Ceramic Sliding on Stainless Steel 5,4; 441-445

time-dependent constitutive model
Application of a Time-Dependent Constitutive Model to Rheocast Systems 5,1; 117-123

titanium
Surface Nitridation of Titanium Metal by Means of a Gas Tunnel Type Plasma Jet 5,3; 373-380

titanium alloys
High-Temperature Precision Forming of Titanium Blades 5,5; 589-592
Hydrogen Embrittlement and Fracture Toughness of a Titanium Alloy with Surface Modification by Hard Coatings 5,1; 64-70
Laser Melting of Ti-15Al-20Nb Alloy 5,1; 124-128

titanium nitride coatings
Surface Nitridation of Titanium Metal by Means of a Gas Tunnel Type Plasma Jet 5,3; 373-380

tool steel
Investigation into Some Tribological Properties of Plasma Nitrided Hot-Worked Tool Steel AISI H11 5,2; 220-224

transformation
Amorphous Superconducting Transformation in Bismuth-Base High-T_c Superconducting Rods 5,4; 446-451

tribological properties
Investigation into Some Tribological Properties of Plasma Nitrided Hot-Worked Tool Steel AISI H11 5,2; 220-224

tungsten heavy alloy
Performance of Powder-Injection-Molded W-4.9Ni-2.1Fe Components 5,5; 609-614

turbulence
Effects of Turbulence and Lubricant Inertia on Dynamics of Journal Bearings Lubricated with Molten Zinc in a Galvanizing Process 5,6; 710-727

twinning
A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26

ultrasonics
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

upsetting-sliding test
Identification of the Bulk Behavior in the Near-Contact-Surface of Steel Workpieces 5,6; 734-742

vacuum
Comparison of Vacuum and Pressure-Assisted Sintering of TiB_2-Ni 5,3; 396-398

vacuum annealing
Release of Water and Hydrogen during Outgassing of Some Materials 5,4; 516-520

vapor
Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38

void size
The Prediction of Fracture Toughness from Specific Microstructural Measurements in Engineering Alloys 5,5; 632-636

water
Release of Water and Hydrogen during Outgassing of Some Materials 5,4; 516-520

wear
Development of Microalloyed High-Carbon Steels for Plough Disks 5,6; 767-774

Weibull analysis
Microstructure and Mechanical Reliability of Powder Metallurgy (P/M) Ferrous Alloys 5,1; 27-33

weld failure
Failure Analysis of an Ammonia Refrigerant Condenser Tube 5,2; 241-246

welding
Effect of Prior Machining Deformation on the Development of Tensile Residual Stresses in Weld-Fabricated Nuclear Components 5,1; 51-56

welding
Failure Analysis of an Ammonia Refrigerant Condenser Tube 5,2; 241-246

welding
Numerical Prediction of Microstructure and Hardness in Multicycle Simulations 5,3; 365-372

welding
Postweld Solution Annealing Effects on the Ductility of Ni-Co-Cr-Base Alloy Gas Tungsten Arc Welds 5,6; 784-790

wing skins
Numerical Modeling of a Wing Skin Peen Forming Process 5,6; 753-760

work hardening and softening
Bulk Deformation of Ti-6.8Mo-4.5Fe-1.5Al (Timetal LCB) Alloy 5,3; 335-352

Young's modulus
Measurement of Dynamic Young's Modulus for Molybdenum Disilicide/Pentatitanium Trisilicide 5,2; 232-234

Zn-Fe
Effect of Coating Characteristics on Friction and Formability of Zn-Fe Alloy Electroplated Sheet Steel 5,4; 469-477

Volume 5 Title Index 1996

A New Process to Develop (100) Texture in Silicon Steel Sheets 5,3; 316-322

A New Tensile Testing Procedure for Predicting Transverse Cracking Susceptibility of Continuous Casting Slabs 5,2; 260-268

A TEM Study of Deformation Substructure in High Strain Rate and Explosively Shock-Loaded Polycrystalline Iron 5,1; 23-26

A Three-Dimensional Finite Element Method for a Nonisothermal Aluminum Flat Strip Rolling Process 5,4; 452-461

Amorphous Superconducting Transformation in Bismuth-Base High-T_c Superconducting Rods 5,4; 446-451

Analysis of Heat Effects in Laser Cutting of Steels 5,4; 526-537

Analysis of Refining of Aluminum Using Fractional Solidification with Forced Convection 5,5; 651-656

Analysis of Surface Heating by Induction 5,5; 657-662

Application of a High-Energy-Density Permanent Magnet Material in Underwater Systems 5,3; 299-309

Application of a Time-Dependent Constitutive Model to Rheocast Systems 5,1; 117-123

Application of the Finite-Element Method to a Design of Optimized Tool Geometry for the O.S.U. Formability Test 5,4; 489-499

Diffusion Bonding/Superplastic Forming of Ti-6Al-6V-2Sn/SUS 304 Stainless Steel/Ti-6Al-6V-2Sn 5,1; 84-88

Effect of Corrosive Environment on the Fatigue Crack Initiation and Propagation Behavior of Al 5454-H32 5,1; 78-83

Effect of Prior Machining Deformation on the Development of Tensile Residual Stresses in Weld-Fabricated Nuclear Components 5,1; 51-56

Effect of Temperature on Failure of Gas Cylinders 5,1; 34-38

Effects of Thermal Processing and Copper Additions on the Mechanical Properties of Aluminum Alloy Ingot AA 2618 5,1; 100-102

Evaluation of High Ni-Cr-Mo Alloys for the Construction of Sulfur Dioxide Scrubber Plants 5,1; 46-50

Evaluation of the Superplastic Formability of SP-Inconel 718 Superalloy 5,1; 71-77

Friction Welding of Al-Al, Al-Steel, and Steel-Steel Samples 5,1; 89-99

Hydrogen Embrittlement and Fracture Toughness of a Titanium Alloy with Surface Modification by Hard Coatings 5,1; 64-70

Laser Melting of Ti-15Al-20Nb Alloy 5,1; 124-128

Microstructure and Mechanical Reliability of Powder Metallurgy (P/M) Ferrous Alloys 5,1; 27-33

Prediction of Jominy Hardness Profiles of Steels Using Artificial Neural Networks 5,1; 57-63

Processing and Microstructure of Investment Casting Turbine Blade NITAC In-Situ Composites 5,1; 103-110

The Optimized Mechanical Properties of the New Aluminum Alloy AA 6069 5,1; 111-116

Transistor Bonding Wire Corrosion in Type TO Cans 5,1; 39-45

Brazing Diamond Grits onto a Steel Substrate Using Copper Alloys as the Filler Metals 5,6; 761-766

Brazing Si_3N_4 Ceramic to AISI 5140 Steel under Pressure 5,2; 209-212

Characterization of the Orientation Structure and Distribution in Rolled Polypropylene 5,5; 637-645

Comparison of Vacuum and Pressure-Assisted Sintering of TiB_2-Ni 5,3; 396-398
